Mark Williams Enterprises has long been searching for a product that provides better corrosion resistance than commonly used WD-40 oil. M/W has always been skeptical of products with miracles through chemistry. However, GIBBS® brand lubricant is the exception, and lives up to its claims. This product is the best bet for keeping unpainted dragster chassis tubing from rusting. It keeps driveline parts corrosion free without plating or painting.

Please take note: GIBBS™ Brand USA products have no affiliation with Joe Gibbs Racing or Joe Gibbs Racing oils.

**Hi-Efficiency Thirdmember Assembly**

The Hi-Efficiency Thirdmember is a raised pinion version of the conventional 9” unit.

The ring and pinion gear has the same pinion offset as a Dana 60™ and as a result, benefits from the same efficiency the Dana 60 is known for.

The ideal applications are lightweight cars (2200# max) and with power limited up to 1000 HP. The units have proven successfully in competition eliminator cars.

The aluminum housing features the thru-bolt design similar to the MW 9” aluminum case. It also features a double angular contact front pinion support for reduced friction. It will fit in the regular and modular 9” housing that are prepared to accept the 9-1/2” ring gears.

Pro Gears featuring 9310 alloy are used in the specially assembled thirdmembers. They all feature a 32-spline pinion for additional strength.

The following ratios are available: 4.77, 4.86, 5.00, 5.50, 5.67, 5.71, and 5.83. All units come with our 40-spline aluminum spool and your choice of a billet aluminum u-joint yoke or coupler. A computer pick-up ring is included.

The gears in the assembly features our Supra-Fin™ processing that reduces friction and eliminates material transfer normally found in the break-in process. Our expert assembly technicians meticulously assemble each unit documenting all critical settings.

67410-XXX Hi-Efficiency Thirdmember Assembly ................. 3080.00

Specify ratio, 32-spline input, u-joint, yoke, or coupler.

**Housing Gaskets and Transporter**

This gasket fits all 9” housings and allows for the clearance required for 9-1/2” and 10” increased diameter gears. It is coated with an EZ-Release seal ring that allows repetitive use. The 9”thirdmember transporter is the convenient way to store you spare Thirdmembers. These also double as a convent way to ship the thirdmembers with a double wall-shipping carton and foam pad.

57929 Thirdmember Gasket with Tec-N-Seal .............. 11.62
Fit all 9” type housing with clearance for large gears

57999 Transporter for 9” type Thirdmembers ............ 67.72
Makes keeping you spare thirdmember clean and dry easy.

57999A Shipping Carton and two 12 x 12 x 1 pads . .11.06
