

9" FORD ASSEMBLIES

The steel housing MW 9" rear end assemblies are custom produced to suit your individual application. MW's years of experience assures you that the finished product will match your exact requirements. Each assembly starts with a brand **NEW** large 9" Ford center. 3" x 1/4" wall 4130 chromoly tubes are installed and given extensive internal supports. The thirdmember mounting flange is reinforced at the attachment stud locations. MW housing ends are installed after all structural welding is completed, including any suspension mounts and or rear brace, to assure true alignment. Thirdmembers are available from the economical nodular iron carrier to the full competition thru bolt aluminum case with 9 or 9-1/2" gears. Axle choices available range from the standard MW Hi-Torque axles to the trick Superlight gun drilled models. Options include Carbon/Carbon disc brakes and other weight saving components. The assemblies below are a few popular combinations, call for a quote on a package that is best suited to your application.

57000 Pro Quality

9" FORD STEEL HOUSINGS

57220

Mark Williams offers several steel 9" Ford housings. Housings with 3" diameter tubes are built with brand new coil spring centers, 4130 tubes with internal bracing and MW housing ends. MW also offers bolt-in housings for some popular applications that are built from stock tube housings with all required suspension mounts. All housings have a lube fill cap, drain, housing vent, and thirdmember studs installed. We can install custom brackets to any of these housings for an additional charge. If you are going to install your mount brackets in the car, we can build the housing with the ends tacked on, so it can be returned for final housing end installation. This will eliminate the welding distortion caused by the bracket installation process.

57120 9" Ford housing with mounts1673.00

Fits '82-'92 Camaro/Firebird. Includes torque arm mount (no brace).

57130 9" Ford housing with mounts1442.00
