MW 12 Bolt Improvements

The MW designed pinion put has improved the OEM crimping design that destroys the pinion threads. Made from alloy steel and 100% machined with hardened washer, our design fixes the problem associated with OEM parts.

Until now, 12 bolt rears have been forced to rely on a standard crush sleeve. The MW solid preload spacer is CNC machined from 4140 steel and heat treated. Spacers are long and must be trimmed to the required length

12 Bolt Billet Cap & Cover

One of the most common causes of rear end failure can be traced to the stock rear end caps. To cure this problem, MW offers a billet steel replacement cap that has an increased cross section and heat treated hardware. **Simple milling required to install.**
