

## 9" FULL FLOATER

MW's full floater 9" Ford Aluminum Modular assemblies meet the requirements of classes that must have full floating hubs. Complete assemblies, including a MW aluminum thirdmember, offer reliability and provide improved performance due to precise component alignment. Being a thirdmember type rear, it's a snap to change gear ratios. With the 9", 9-1/2" and 10" ring and pinions, the Modular is suited for Top Dragster, Competition and Bracket Class applications. Thirdmembers are now available with 9-1/2" and 10" diameter ring gear (in select ratios) for added strength.

The MW floater unit incorporates sealed ball bearings (self lubricating) for minimum drag. The Floater hubs are available with a 5" or 5-1/2" bolt circle. Complete rears include full floater assemblies with a one-piece axle, (standard width only) and a large pinion thirdmember. Steel or Carbon/Carbon Disc Brakes are available for superior stopping power along with substantial weight savings.
